

## **2 Care for Me Outreach**

### **Teach Me Mobile Tutoring and More**

#### **Statement of Need**

Children from low-income households face significant challenges in accessing quality educational support. Many schools in underserved areas struggle with large class sizes, limited after-school programs, and insufficient staffing to provide personalized attention. These obstacles contribute to lower literacy and math proficiency, reduce confidence in learning, and limited opportunities for future academic success.

Our online tutoring platform directly addresses these issues by providing flexible, cost-effective, and personalized instruction that meets students where they are.

---

#### **Program Description**

The online tutoring platform offers:

- **One-on-one weekly tutoring** (1 hour per week) in core subjects like Math and Reading.
- **Homework support**, where students can submit assignments electronically and receive guided instruction from trained tutors.
- **Consistent tutor-student partnerships** to build mentorship relationships and foster confidence.
- **Flexible scheduling** to accommodate students' home and family obligations.
- **Digital access** to learning tools and resources, bridging the technology gap for underserved communities.

Students who participate in the program will have the opportunity to improve their academic performance, develop essential study skills, and engage in positive mentorship relationships that extend beyond the classroom.
